

Child Neurology of Tulsa

Insurances and Payments Policy

Child Neurology of Tulsa is contracted with many insurance companies. However, like most medical practices, due to many reasons, we are not contracted with some insurance companies. Please be aware that the contract between Child Neurology of Tulsa and your insurance company requires that copays, coinsurances and deductibles be paid by you at the time of service. Any fees not covered by your insurance that Child Neurology of Tulsa charges are explained at the time of your first visit and available upon request.

If you have an insurance that is not contracted with Child Neurology of Tulsa (we are “out of network”) then you may be offered a “cash discount” to be paid at time of service (cash or credit care). If you choose to be billed, then a minimum charge of \$100 is due at time of service and the remaining balance on the full charge will be billed.

A no interest payment plan is available for those in need. Please call to speak with the billing specialist to discuss and make arrangements.

Failure to pay balances over excessive periods will result in termination from the practice.

We do charge for bounced checks.

We look forward to seeing you and helping care for your child.
